e-Justice Communication via Online Data Exchange

e-Justice Communication for Europe

Rome, 14.10.2014
Large Scale Pilot Projects (LSP)

- ICT Policy Support Programme under the Competitiveness and Innovation Framework Programme (CIP)
- Engage public authorities, service providers and research center
- Maintained by the EU Member States
- Building cross-border e-Government services reality for 500.000.000 Europeans
Large Scale Pilot Projects (LSP)

The idea:
- Create sustainable and extensible solutions
- Create software building blocks which can be easily adopted and used for different kinds of IT-projects

Existing software building blocks
- e-Delivery, e-ID, e-Signature, semantics, ...
Goal of e-CODEX

Uniformity?

No, but …

Interoperability, Integration and Standards!
e-CODEX at a glance

- Beginning: 01.12.2010
- 20 Countries
- 25 Partners
- End (proposed): May 2016
- Max. 24 Mio EUR
- Start of Piloting: July 2013
Partner for a faster justice interoperability

- Austria
- Belgium
- Czech Republic
- Estonia
- France
- Germany
- Greece
- Hungary
- Italy
- Ireland
- Jersey
- Lithuania

- Malta
- The Netherlands
- Norway
- Poland
- Portugal
- Romania
- Spain
- Turkey
- United Kingdom
- CCBE and CNUE
- ETSI
Enabling access to justice systems across Europe:

- Easy and secure access to legal information and procedures
- “Improve the cross-border access of citizens and businesses to legal means in Europe as well as to improve the interoperability between legal authorities within the EU.”
- Greater cross-border effectiveness of legal processes through common standards and greater interoperability of information systems

Architectural Overview
Several aspects:

- New Partners
- Technical sustainability
  - Connector
  - Gateways
  - XML-structures
- Legal topics
  - EU-law (e.g. eIDAS, e-Justice, etc.)
  - Mutual agreements (e.g. Circle of Trust)
Financial aspects:
- Community funds
- Financed by MS (re-funding? co-financing?)

Governance
- short-, medium- and long-term
- Other initiatives (e-SENS, CEF, ISA, etc.)

Support
Sustainability

Starter Kits

Preparing a well-structured documentation package where up to date information can be found even in the absence of the original authors

i.e., clear organisation, very good indexing, filtering out of redundant, confusing or obsolete material, a list of deviations from the documentation that is included

the migration to maintenance mode is done before the project's end in order to test if things work as expected (e.g., in terms of infrastructure)

Next wave of pilots

Communication & Marketing related to the pilots

Carsten Schmidt, Germany
